

PALTM

LIGHTING

THE PAL BACKYARD ECOSYSTEM

PAL Lighting's Pool & Backyard lighting system offers unparalleled convenience with its seamless integration into a single app. With just a few taps on your smartphone or tablet, you can effortlessly control all aspects of your outdoor lighting scheme. Whether you're looking to illuminate your pool area for a late-night swim or create an inviting ambiance for an outdoor gathering in your backyard, PAL Lighting's intuitive app puts the power in your hands.

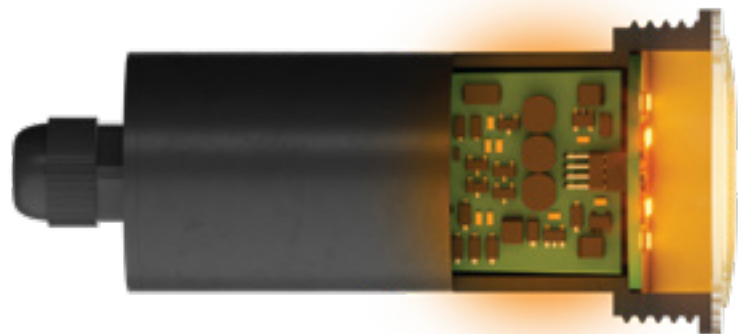

From adjusting the brightness and color of individual lights to setting customized schedule for automated operation, managing your entire outdoor lighting setup has never been easier. With PAL Lighting, enjoy the simplicity and flexibility of controlling your pool and backyard lighting from anywhere, anytime, with just one app.

DESIGNED TO BE DIFFERENT.

Stop accepting poor performance and high failure rates. Our innovative design moves the heat source from the light, out of the pool, resulting in unmatched reliability. Immerse yourself in Brilliance and trust in a pool light that breaks the mold.

PAL lights redefine versatility, eliminating the need for water cooling, and extend their use from within the pool to landscaping and beyond.

Traditional pool lights contain an integrated driver, which generates significant heat and requires water cooling.
High heat leads to premature failure.

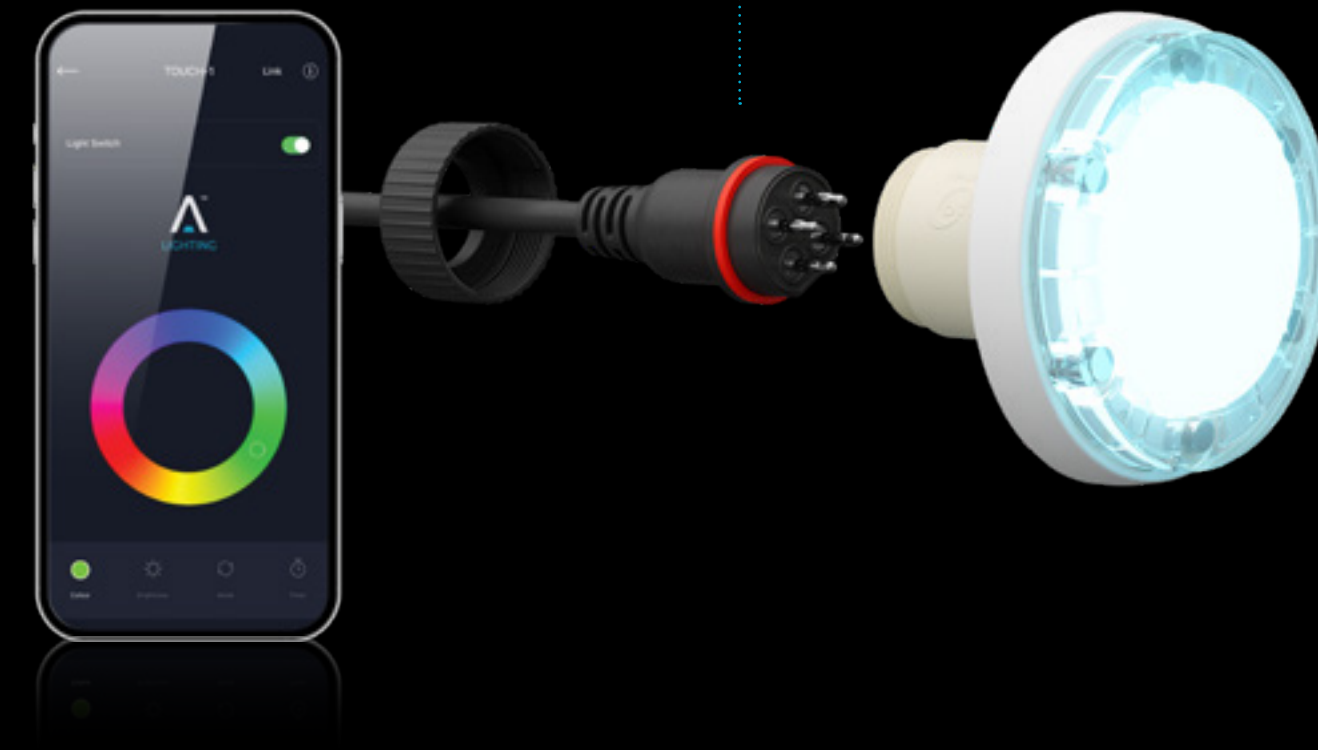

● Pairs perfectly with Automation

Seamlessly links to, and takes direction from any major pool automation system with the push of a button. When setup as a standalone controller, experience the full expanded PAL feature set.

● Service, Simplified

Simplify lighting maintenance with our quick disconnect feature, designed to streamline field replacements without the need to pull new cords. Easily swap out lights in the field with hassle-free maintenance.

CRAFT YOUR OUTDOOR ESCAPE

Redefine outdoor ambiance with our advanced zoning control. Take full control of your backyard lighting by customizing hue and brightness for each section of lighting. From vibrant party vibes to tranquil relaxation, effortlessly adjust your backyard to suit every mood. Welcome to a backyard that's uniquely yours.

YOUR COLOR, YOUR STYLE

Unleash your creativity with our Color Wheel. Effortlessly customize your lighting scene to match your mood, décor, or occasion. With the intuitive touch control, choose from an endless spectrum of colors, adjust speed, and set brightness to suit your preferences.

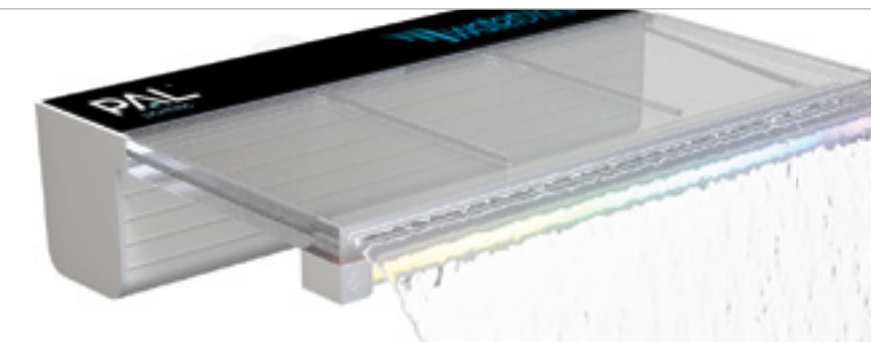

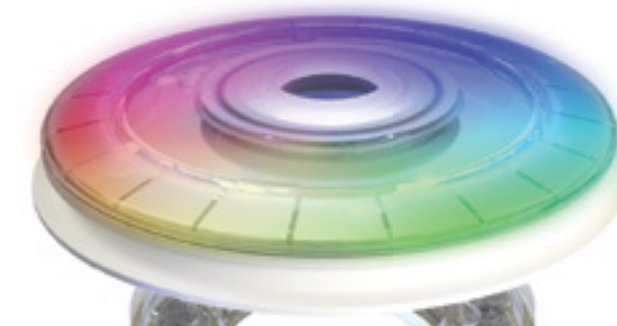

DESIGN YOUR BACKYARD MASTERPIECE

Distinguish your backyard with our innovative LED features, seamlessly integrated into the PAL Ecosystem. Whether it's the soothing cascade of a **waterfall**, the playful allure of **bubblers**, or the captivating design of **water spheres**, each element adds a touch of sophistication and charm.

Let your imagination run wild as you craft a space that's uniquely yours and transform your backyard into a haven that reflects your style and personality.

BACKYARD LIGHTING

Harmonize your outdoor space with our backyard collection, fully controllable through the PAL app. From elegant garden lights to practical path lights and sleek wall lighting, you can enjoy customizable lighting tailored to your preferences.

LINEARSTRIPLIGHT

Our success is driven by the uncomplicated combination of basic illumination principles and strong creative vision. Our philosophy with regards to LED Strip Lighting is that the actual Strip Light is not a feature within itself but rather a tool used to highlight the features surrounding it.

CUSTOM DESIGN & SIGNATURE PROJECTS

PAL offers in-house designs customized to the plans supplied by the customer. These plans are marked up with design concepts to suit the individual requirement of the design, highlighting the pre-installation requirements of provisions such as the type of strip lighting and the direction in which it requires being either forward or downward facing and on occasion upwards facing.

When submitting plans, it's always recommended that you also submit your 3D renderings or Pool Studio .sav files. During this stage of design, if requested, PAL offers a full design concept when Pool Studio files are submitted. Through this the end user will visually be able to see a 3D rendering of their project in its completion stage highlighting the designs features.
